Success for Successful

Advertising Format

It is an advertising proposal for people to watch television and show that they are deprived, go to the supermarket and choose the items they saw or heard on the radio attached to Daniel Pays and they take it free. After a while the promotion ends and the numbers are announced on all the radios and television of what Daniel paid in figures and the name of the products and services and then put a label on all the products Daniel paid. Then some time passes when people buy those good products and return to the promotion. Buying for free with better results numbers every year.
Daniel pays is registered by the supermarket checkouts.
That day or those days will be notified by the media with advertising and only the adhered products will be notified.
Then there is the big day that no one pays and then the big days of saying what Daniel paid.

saygraciasporeducacion@gmail.com

The looker

Some musical stops but music made with a controller.
We all want a recording studio. But where to put it if what we want is to live the summer.
The proposal is simple with a PC and a computer and a 25 or 30 oxygen with a glass that can be to the sea, the rivers or the mountains made in a cabin without noise insulation and glass, it can be achieved that we are inspired to record through keyboard and technical help without ambient noise even if there is wind, etc. The synthesized sound is recorded in a studio that has speakers or headphones with a USB input output.
Then the owner of the stadium will be able to upload to his free upload account and eventually pay the royalties to the travelers. The technical service will be charged and then left on a form on the upload page free to charge. These projects have to be in places where you can enjoy the summer, not ruling out that it could be in a campsite or bowling alleys, a terminal or snack bar.
It is better that there is light and otherwise the power generators would not cause any problem since it is a USB cable. A microphone can also be incorporated. Hold competitions and have a radio station that supports them in the place where you want to hold them.

Music is like water, incipient, colorless and odorless, which is why it can be said that he who makes music makes drinking water.

CinePlay

3D cinema that feels.

It is about having video game controls in the seats and showing them on the big screen. It's about starting car races. Armed wars and flying on airplanes and football.etc.
It's simple, you put on the movie, that is, you turn it on in the specially made seats, the seats for real movements so you can feel the adrenaline.
Adapt controls. And video game adaptation. The little ones and not so little ones will have the possibility of choosing which cinema to go to according to the video games that are on the bill. Protagonist because you are going to feel the cinema, I give you an example. I played in a racing machine that moved the body and you could feel the pits and the speed and the roar of the car. So if we manage to make bodies to play on the big screen and if it is done as a feature it would be like a competitive amusement park where the cinema will be renewed. It occurs to me that you can sell the video game to practice at home.

It would be possible for entertainment with so many video games that exist on the market and in 3 D. The result is surprising sensationalism.
It was done with group seats but it has to be done individually and handled by the same young man in a competition. In the future of shopping malls and parks we will see this cinema that has a robotic but very human future.
It will go from the screen controlling to the viewers being the protagonists of the screen. It is making a 3D game that can be done at home but at a big screen level. We must invest in robotics and call on more video game developers. There will be a presentation of this cinema. They are the new machines in the world and will renew the market. The feeling of flying. On a boat, a submarine, a racing car, Olympic sports, etc. All in a great competition.
I remember that we played races on common machines linked to monitors and it was beautiful. You have to imagine it on a screen for everyone as it would really be. Body with all controls. Let's imagine a room where 40 friends in a cinema play Play Station 3D together with a mobile individual body.
Disused machines can be recycled and adapted as seats for Cineplay theaters. You can also make an entertainment park in which there are warehouses conditioned so that each facility has only one game and thus visit, for example, the Cineplay complex and have the option of entering races or airplanes or soccer and thus

making a center outdoor commercial (e.g. rodeo park)
Possibility of being in Batlle park (craft fair)

panic button

It is about making a comprehensive application.
It is an alarm button that works 24 hours a day.
It would cover several areas and act as a 911 type service but with several different characteristics (not excluding this service.
So by calling professionals and people from trades to work on this system.
We all already know it and it rings in houses that have a panic alarm (this can also be integrated). In some areas of health it is also already done (and can be integrated).
The thing is that not everyone has a comprehensive application that saves them from some issue (even ordering food or medicine.
Then make agreements with companies that wish to join the service and in this way the app is updated. The personnel who are going to be hired are paid. (Entry through competition or people who had

taken these companies and are currently not active)
Then the panic call will have a cost (for transportation and payment of personnel)
The application is not going to be free because it has to maintain a high prestige.)
It can happen to all of us to be left without "something" or far from something and the Panik button is the solution for the population. A campaign to sell the service. (This is the cost)
The advantages are obvious. A lot of work for associates in all areas and all areas, aimed at people who are alone and their families can sleep peacefully.
Also for people who are working on the street. Rather, it is about covering everyone's needs. If I have the service and for some reason it is difficult for me to go to collect, I have a service through the app that brings that money to my house.
In short, we achieved more work for everyone, also efficiency and speed in dealings, and company at all times. If you need an urgent notary. Worker payroll and are configured in a menu so that when the client presses the panic button it is effective and quick to establish the link.
All this can be possible with reverse charging and the entities that are in charge of these companies. It also occurs to me that if a building is used, the business can also be done from a SA company.

Also taking into account the" calling.uy " project, you can start there.

Muscat Loans

Music is like water, incipient, colorless and odorless, which is why it can be said that he who makes music makes drinking water.

Calling.uy

Oops! They are calling.!

New call center.

We all have groups of friends on social networks.
It is then that those who have a product or service can register their company and extract their contacts by calling.uy
In this commercial way, the networks begin to be all fruitful since a questionnaire will be given to new clients and all those registered will be able to establish a sole proprietorship (registered or company).
So that calling.uy is the call center for social networks.
Anyone can sell and buy simply by calling on their cell phone and being able to work from wherever they want.

Then almost everyone will be calling each other.
Contacts can be extracted from associated social networks (even telephone) and will be able to operate in the business as a paid service. And it can be extended to other countries or done intentionally. (Because now we have friends from all over the world)
This service will be of expensive origin like the old telephones but mediated so that the client(s) that we will all have the option of regulating the costs according to the currency.
Now you enter for free and sell for expensive. The conventional practice of calling friends and colleagues will also continue as a source of clients.
It was like when we had email and imported all the contacts or when we migrated networks. So by having this service, people will sell better and call centers will be able to work more competitively in the market.
The business is going to be in cell phone recharges. (Which are going to be massive)
Why would this company be successful? Because we all have something to sell, whether new or used, and small and large merchants will also be able to carry out their campaigns through friendship calls.
The application is downloaded, the contacts are imported, the seller or company data is given, and an initial recharge is given (the investment of the calling.uy service)

After those sales, calling.uy will have a profit (%) that covers expenses)
So at a time when everyone is looking for market acceleration and looking for new and accessible ways to include new products, they already have the solution.
Now make promotional packages more personalized with company stamp. (All this has to be on the registration form)
The associated company is the cell phone providers of each country.
A little good publicity and it's done.
The most competitive import and export.

Models

A few years ago in Santa Teresa there was a parade of female models in the capatazia so it occurred to me why not make the big supermarkets and stores the miss english store the miss geant for promotion and sales and also give jobs to beautiful girls which the neighborhood met and also to have a competition with prizes which customers will want to buy.
It is then about beauty reaching everywhere and any country can implement it and you can run the campaign on any radio and also on television and make the advertisement from where you are looking for the English miss store for example and all the girls go to want to be there and this girl is given good prizes with a

Jury as is usually the case by the commercial managers and that has been filmed and transmitted by some social video network which would show the city where the culture is lived by its people their work their story what can become in a while is a documentary that could be called the most beautiful girls and that can go through international channels or international channels just imagine the number of supermarkets and those that go below the large shopping malls and mega shopping and fashion shows that, although they seem out of fashion, are always giving you the opportunity to see the latest news in an unbeatable optical way. I think without age limit or by categories, the girls who are showing themselves today on Instagram or other social networks like TikTok have to have contact with the public even to have more followers and that is achieved through these contests with prizes which would lead to the success of I will return to the social clubs so that they do not become extinct and after which important people Loren gather both money capital and human capital from that point of view achieve a push towards economies taking into account the televisation of events and the radio propaganda what can I tell you if it is necessary.

He goes on the run

It's to make a television program.

It consists of giving away the prize of a trip to a place within the country you live in.

It occurs to me to do internal tourism.

"He goes on the run" because from there in the program he has to be ready to travel.

The program consists of questions and answers about geography, and everything that the country has as its heritage.

It also occurs to me that there may be a final prize of an excursion (consolation prize) for all the other participants.

It can also be about telling travel stories and having an audience vote for the best.

Entertainment for the whole family.

It can be sponsored by travel agencies, hotels, tourist stays and the entire area of ??internal tourism in the country to be carried out and with the available budgets.

It's about making it enjoyable and fun for viewers so they can make reservations.

Casting or prior call. Social networks.

Missing?

Missing?

Comprehensive delivery service.

On the one hand, merchants, manufacturers and producers join together to be able to bring their products to the demand of any sector.
What is missing will be professionals and people in the profession that is in demand.
That is to say in the clearest sense 'I'm missing the bottle' we call gas. But during the course of the day we may be missing a television, a cell phone charge, a trip, an armchair, some repair, supermarket products.
It is giving comfort to people. And give them all the cravings.
This is currently done by sector but innovations are always coming to the market. It is not selling and it is not by catalog, and it is not a fair. It is either urgent need or imagination.
Then we can help each other a little more if a friend or family member is missing something.
Let's imagine a huge delivery mega shopping center that even sells cars. How

to walk around and be the most trained call center in products and services with software that gives you exact information about what the client needs (is missing). You can use any warehouse if it is on the outskirts or set up in a central city location..
Then there is the place where professionals from different sectors work (such as the Expo Prado) even taking that example as a sample. Because it is a centralized delivery. For the consumer to say. Missing?
We deliver it to you quickly.
It has to be an international business since Facebook, for example, has about two billion users. So let it start and grow in the telecommunications offices. You have to put people to work who know when they are lacking and they are going to be the best advisors.
Then the advertising campaign for the reunion of the family with a large green space with games for children and rides, horseback riding in short that is not a brusque buying and selling with machinists and automotive tests. (Entry would not be free) That each associate can show from there the yerba mate process for example. Missing?.
It is for entrepreneurs who are on a list in each Latin American country and have not been able to translate their projects and in this way Latin America unites through work and effort as other institutions have already done.
"All cultures united, all businesses united"

There was the warehouse then the supermarket then the shopping malls then the mega supermarkets now we have to do a mega shopping.

Then people say what is missing and market ties are built.

It is your business together with others, it is a mega business and we lack nothing.

The most profitable way to do this is to buy housing complexes and convert them into galleries. (Because there is inside too) but the cost increases.

My proposal is all the attached virtual stores and a space like the meadow.

Bitcoin Card

To speed up business.

1) Transparency:
People who invest just want to know how to invest and where they earn and where they get paid.
2) Currency:

Yes, it can be converted to dollars, euros or other currencies.

3) Investment

I don't think people have any problem investing.

In the event that you have problems, you have to give franchises, that is, $10 in loan for your first investment with the possibility in the same menu of investing $20, 50, 100,1000 (but starting at $20 without that franchise.

4) Army

So after making your first loan you form a large team of collaborators who will guide your company in the future.

5) Sensation

Make a video that doesn't hurt (quite the opposite, happiness. Where have you seen scary propaganda?

Finally, give a tour of the page explaining what the business is like with graphics and a summary that each user has their access code and sees their money at work.

It is so that after having made their investment deals, these investors are given the debit or credit card which they will be able to use with other associated cards even in other currencies to enter the money transfer market. Even if you want to make the silver card for use by all banks and so people can use it in participating businesses following a global campaign by an international advertising company.

Nowadays, with the rise of Bitcoin, it can be easily associated with visa, master and other cards so that people can

easily use each one with the currency of their country. With a simple paperwork of personal and work data. And this leads to the fact that if the card is known and gives better benefits, why not have it and also work with it so that merchants invest within Bitcoin and can also debit for investments. Bitcoin pays, but it is more important that it can be translated into banknotes through the card, which carries a percentage discount rate according to, for example, sales that carry two discounts, the one on the platform and the one on the card, and a third that would be one cup. of Silver Card. It is deducted as a tax rate until it reaches the bank for the value of the bill. (An online calculator is used for the client).

The money can be withdrawn anywhere in the world and Bitcoin would be common currency.

If they are to charge $3.28 that Bitcoin receives, the end client will charge 2.80. Bitcoin will not make withholdings. Then many more people will be investing in the market, which will make the transfer of money that can be carried out as a bank and give loans and direct pension savings accounts more reliable and effective. We must create quick access to services without useless bureaucracies.

The purpose of the silver card is to reach everyone's hands by extending it as a promotion. (Since it is not going to be totally free).

It also serves for commercial transactions by converting banknotes into currency through the Bitcoin institution with a single cost so that participating businesses can offer discounts to the public.
So the investment and banking business come together, having to be serious and safe. So the same investors are given freedom and flexibility to carry out their actions within a framework drafted by a notary public (without being appealable) so that the investor has the guarantee that they will collect. All Bitcoin has to have that guarantee in order to become a leader in the market. You can do a lot of business at the banking level with the card since without this Bitcoin will be subject to only the Web and the alliance and the ease of use will bring new investments that may already wish to do so in their currency (translation into dollars or euros and then to Bitcoin) in a reverse way which would give them a discount on the investment and instead of investing $2.80 they invest $3.28 and they can do it through Silver Card.
And the most important thing is that it will be used for teleworking.

Libretto

1 How are you my love for so long without seeing you
2 I have come to find your heart
1 where were you that I couldn't find you
2 was living a lonely life

1 Then come with me
2 what will we enjoy?
1 there is so much to live
2 We still have time

1 do we recommend?
2 Of course yes
1 we can then go out into the sun
2 and rediscover our youth

1 I always had time for you
2 I am honored by your words
1 let's walk in the meadows
2 I would like those flowers

1 and so much work
2 to get my love?
1 that's why I knocked on your door
2 okay kiss me and let's go from here
1 I think I'm starting to be happy.

Advertising Bed bases

The husband comes home with flowers
And he shouts: my love, the freighter brought the bed base.?
Woman: yes my love, I came to try it

Man: I brought you these flowers. And how was the day?
The upstairs neighbor spent the whole day hammering away.
Man (lying on the new bed) looks to the side and says to the camera. Hammering?
"Brand" bed base.
"Hammer proof."

Trap idea games

It is a group board game which competes with other users who are gathered in another space environment.
Through the application, which would be a game of questions and answers and what is caught are the mistakes of the opponents, adding scores over a period of time, that is, the group that wins is assigned a score for each trap and it is cumulative for the next game. It is a police detective game. And you can play outdoors and look for mistakes in society. It will be done by zones.
Those who remain will have sanctions of not being able to enter the game for certain periods of time that vary depending on their errors.
If you play as a slot you have to pay the fine to enter again.

Models

A few years ago in Santa Teresa there was a parade of female models in the capatazia so it occurred to me why not make the big supermarkets and stores the miss english store the miss geant for promotion and sales and also give jobs to beautiful girls which the neighborhood met and also to have a competition with prizes which customers will want to buy. Requirements (advertising format)

Matías (at school) can I study with you?
Bar: Requirements!!

Fernanda: (beach volleyball) can I play with you?
Bar: Requirements

Alex: can I work in this company?
Bar: Requirements.

Juan: (in church) getting married, can I kiss the bride?
For music (and choir)
Requirements

Because in this life not everything is money.

Do you want friendship?
You have "requirements"

You see a kiosk and a boy and a girl enter and they say: do you give us requirements?
Kioskero: and we sell it.

Chocolate bar, jam, alfajores, whatever you can think of to market, and/or industrialize.

Original

saygraciasporeducacion@gmail.com

Clothes and Hairstyles

I have seen some wonderful haute couture designs and other women's clothing of the highest quality in fabrics and seams (I had already said this about Pinterest) why not buy those used dresses that are generally worn once or twice and then import them to countries that There are many and there are many women who would be willing to use them. It is understood that the business is the sale and rental in new stores that have stylist services. This would be a chain of houses for women to dress and style their hair at the best price to look good for the holidays, an outing, a photo.
Nowadays there are many "simple" women but I'm sure they don't want to be.
Let's imagine now that everyone wants to stand out (and men too) that these

clothes are imported and that the market moves faster on a global level. (Renting rarely used clothes and with good hairstyles)
So in this way, clients can even do a model parade or promotions for different products or simply to go to a wedding or a birthday or for a romantic outing.
Using the perspective that the fashion look can be accessed by anyone at a reasonable price and with credits.
Meanwhile, the market can be renewed with new designs with the same strategy.
Then the client is going to enter this house and come out in top-notch fashion.
It is supposed to be for people who make a small or medium salary. And then a total liquidation is made every time to renew. All women deserve it and to access it you have to wait a while but not much.
May this house be in the shopping malls of all countries. You can advertise on the same social networks as something imaginary but that will exist.
I have seen little for men but it can be done.
So when you buy used clothes for rent with a hairdressing service, we have the result of supplying the entire community and thus standing out from the rest (that's the business). Let's imagine dressing all the hi5 women in a house that treats them with special care when customer. The entire industry that would move from the one who makes the fabrics to the photographer through the buying and selling of dresses. There will be

greater consumption, more rotation and business dynamism.

Friend's Day (plus the other days)

It is a job for social networks.
It happened to me that I don't know why, no one greeted me for Friends' Day. So I didn't do much drama, it's a day like any other, although it gave me something to think about since I didn't either, perhaps for fear of rejection or that my friends no longer feel comfortable, I was halfway between self-conscious and reflective.
So it occurred to me that sometimes, what happened to me, I didn't say hello, perhaps because I didn't know how to express the truth. I had a lucky friend and I blocked her because I didn't know how to address her I could have said "happy rich friend's day" as a joke.
So my proposal is to make cards on all social networks and greet "Happy day of the stupid friend" Happy day of the crazy friend" "Happy day of the cowardly friend".

• One option is for the social network in question to gather information and greet users on that day or any other day, and another option is for users to send cards with dedications from a site, or both.

This way of making greetings with jokes brings the links closer together and can be done for other days and the social network can put its badge in the lower right part and on the left place the DT seal and my initials if they wish. Also, apart from "icebreaker" cards, you can make greeting videos (pro service) and send alfajores, flowers and desserts from business and professional service so there would be consumption that can include these joke cards so that the friendship does not end.
That's the idea and it can be done for other dates, July 22 is World Brain Day "Greetings geniuses!"

Europe & USA

I felt bad for the human being
And I looked well for the complexity
Of the problem that must be solved
I understood then that even
In the deepest complexities
The one who had the complexity was me.
The human world is unchangeable
And if I can't change a problem
The less I'm going to change the world.
This doesn't mean I lose my kindness.
But what I can't do is think about
totally non-existent problems.

Because people get used to faking problems.
That's why they laugh when the good guys insistently try to teach the good and long-awaited habit of throwing away the garbage properly.
It's simple, that's just my concern.
Don't worry about me, I also feign complexities that for you should be non-existent.
Because you or anyone else has a problem that is mine.
Take care of your job, your health, your money, your partner, and your assets.
Because it seems like there comes a time when no one helps you with anything unless you have money and even if you can give love it will still hurt and it will be repeated over time and you will see generation after generation the triumph of human hatred.
Are there people left who want to worry?
If you still persist, don't doubt it, you're good.
Wise is he who does good even knowing evil. Because that is where creativity comes from, that is, survival, and it is worth saying that the wise man with his work likes to see others happy and it is not about the human being, it is only about the animals and those we have in our care.
And that's why kindness is because you can do and see for others and help.
Don't mistakenly believe that the opposite happens to you because you always work for yourself.
Interpreters also make mistakes.

You are not in the middle of anyone and get out of your head thinking that you are bad.
Just because you are alone doesn't mean you are bad and doing magical things doesn't make you bad. Bad people are few. They are the people who take away your thoughts and insistently conspire against you.
In fact, you must not interfere with other people's family affairs. The children are not to blame, they are innocent and if you attack them you will be an unhappy inferior.
And so they surround you in falsehood, be honest but don't expect anything or anyone. Today the world has become a sublime falsehood. Never be afraid because he who does it pays for it. And if you are merciful you will feel relief to live.
Because we are not idiots and that means that we have time and that we do not let ourselves be beaten.
Then in my dreams I felt fear as if I were in mourning. And I understood that in moments of forgetfulness we have to draw strength because some of us have to do something. And we do it because even though life is unfair, the world will continue and we will not go through like the rest even if we are one of the rest, as Cohelo said, "a dreamer is indomitable."

If your audio equipment breaks, what do you do? Juan
I download a radio application.

What if you suddenly run out of battery?
Should I buy a latest generation one?
Then maybe you can't pay the electricity!
I don't care I get a loan.
And how are you going to do all that?
Easy with the new "iPhone" almost everything is possible.
Almost why?
Come help me change the tire that's flat...
And for that there is no solution Juan?
No, but you feel like a kid, you feel like a kid

New "iPhone" safer than a kid.

Superuse

Shopping chains with items imported from the USA from all commercial sectors.
Investment in construction in strategic points and making agreements with governments for commercial exchange at the ALADI headquarters.
Give work to residents and foreigners (in the case of Uruguay.)
Contact with woltrix from the Americas area to carry out imports and exports.
Promote social inclusion and without the three-month trial. When superusa personnel are hired, they will have all the attention departments that will take over and supervise the personnel. I work for everyone part time so that there is more.

And a Global campaign of what is to come in a mega undertaking.
The success of superusa is that it will have items for sale from all countries, that is, a vase made in China will be sold in Peru and a folding table made in Mexico will be able to be sold in the East. A mattress made in Finland will be able to be sold to France.
Superusa is commercial and cultural exchange since social networks exist. And the people need work. And if the world opens up to sponsoring countries, imagine a free market with low taxes (only investment rates in fuel and personnel, for example.
What is prohibited and does a lot of harm to the customer is that new products are kept in warehouses and this devalues ??all other merchants and competitors who from now on will make an alliance to sell work at a global rotating level.
Create a card payment network and make the cost cheaper than smuggling. The countries that join superusa will have the strongest currency for their exports.
Cups can also be frozen in US dollars in all countries that are in the superusa network.
A platform will be created on which (it could be Amazon) people place orders from their homes and they arrive by superusa.
Offer to invest. Do not contaminate. With charity of giving discarded things to the churches. With good morals because you have to help a lot of people.
And that money is distributed equitably according to the needs of the worker, so

much so that an artisan living in Brazil has the possibility of selling his product according to his economic need. Open to ideas and livestock and agricultural communities. Profiting but with honor.
Cities are going to become industrialized. Help cultural organizations, art, cinema and make a good campaign about what you want to do with quality.

Social Network Classrooms

It is a project for the education system from children to the highest levels.
It is simple, it has to be generated from real schedules of each
country "virtual classrooms." In which students and teachers meet. It can be according to each country and each language. It would be like zoom but more developed. And systematic as in real life. The name classrooms is because, depending on the subject, there will be

schedules and classroom options.
"Mathematics" physics" philosophy" with degrees. School grade 1 with teacher: a,b,c,d,h,i (i is sixth) High school grade 1 (basic cycle) with the subjects. Then the professor of the faculty. Virtual notes will be delivered every month. The
Students will be registered and redirected to a regulator and teachers will register to teach classes.
Then it starts on the date and the same for the exam schedule. For the university of work there will be an access with "classrooms" referring to each subject. Higher authorities such as management will continue to work in the same way as if it were real. Like the administration.
To develop classrooms you have to imagine the school system, the high school system and the faculty system and even the professor.
Plus the administrative without neglecting the work of those involved (teleworking)
Also support and recreation classroom classes. And higher classrooms with new technologies and the good thing is that other subjects can be implemented. Can make one public and another private.
For the population with different abilities, classrooms must be designed by experts in disciplines such as music and educational games, plasticine and readings. (They know more) Psychomotor education. And in some cases of

transfer for health care. (Design a sector for this purpose) that the expense is covered by the care system and in other countries by the pension.

Private domain and company domain (VIP)
Email
Phone.
Example:
http://www.danieltriunfo.kids.org
http://www.danieltriunfo.kidsphone.org
http://www.danieltriunfo.socialnet.org
When you enter, Boomerang appears with a navigation bar of all the social networks united.
Within the domain
Email: danieltriinfo@kids.org
Cell: danieltriinfo@kidsphone.org
Friends: danieltriunfo@socialnet.org
(Entered by user acceptance upon request)
Invitations are made through existing social networks.
Each domain will cost $10 per month.
The competition will be in the CEO result.
They will gain prestige with scores (stars) and number of followers. (In search result view.)

Thus there is a redirection of future buyers within this "Boomerán" platform Boomerang will look attractive to general commerce and can be treated as a Google application.
Implementing the new in corporate video advertising.
When you invite your friend, you are given a free month and can cancel.
(But it attracts customers)
What is convenient is to keep them as an employee. (From the friend and other merchants)
What not all invitations will have Boomerang domain (all associated networks) With boomerang you can access all associated domain pages.
When you receive the invitation, you are given a small survey about your tastes, personal information, and hobbies. And most importantly, the user has to quickly find what they are looking for so they can search for more.
The scores will be given to traders by response time (on product questions)
Associations have to be made and/or creativity stimulated within the areas in which they currently work. (Economic field) (Social field) (Sports field) etc., in order to cover all areas.
The reason why Boomerang would be a success is primarily because there are a great job search. There are also great offers that must have a place and many entrepreneurs who need their place.
Boomerang is a reorganization of the Web.
With a view towards productivity.
There are many girls to do promotions.

All with posters in a campaign "Do you know Boomerang?" (But not even the promoters must say what it is about) after a while the mystery is revealed. Then the recreation is consolidated with the social network "The Walker" and "Find you". In Boomerang. (The books are on Scribd)

Waiting answer

Kids Network

It is about creating a social network only for children from the moment they learn to write until the end of schooling.

It is then about taking care of the data and content that they themselves provide, knowing that they will

having to hire a personal tutor for registration. Let's say it's going to be a new Facebook but kids. People are very concerned about content made by adults and for adults. They want to find their space where they can share their photos and their stories and their art and their beautiful childhood, making this a future industrial market (which already exists) but the new

Generations have other demands and other fashions and they will want a new world. There are already many adults working for the children's sector. A web search engine for kids network. Then the kids will be able to define their tastes and thus leave school with teenage friends who will have to move on to another adult

social network. Meanwhile, promote games, music and theater and cinema and general entertainment with a new YouTube Kids. And Google kids. That is to say, the networks that are formed but with the kids format, including the stores. That is to say, a kind of Disney Word but that everyone has it at home. It is very important to support good behavior and healthy habits by promoting contests and grades at the end of the month and leaving homework.

entertaining. Parents should not forget that the good management of the Kids Network user will affect their company or their industry, knowing that the little ones tell each other everything. It is a starting over from those first social networks but now with a very large market that will invest due to reliability (creating a business and responsible credit card

which with a tutor's signature can be used by the little ones.) As it is a Kids social network, everything that is walks, birthdays, trips, in short, healthier encounters has to be implemented and so generations are built that benefit the environment in which we live by instilling cultural exchange and paying for the promotion of good behavior so that they have incentives to

not be manipulated. They can have a mentor such as certified teachers who will evaluate positive actions. You can also start now with followers and groups. May there continue to be a cultural exchange and lots of fun. There has to be

a lot of debate and critical thinking and testing for proper functioning. All this is complementary to a
new stage with what it would be like with Boomerang for adults
From there Global Shopp is consolidated. With the respective cell phone derivatives and everything that is new on the market. This includes sports and all educational subjects and recreation. Also do playing exercises to prepare for dance theater media and to be professionals as well. That
There is constant support among them to reduce exclusion. Kids Network is the beginning of Boomerán. Book "when we look to the future."
That new connections such as the Wi-Fi modem be tested and that they have intranet server providers in version 3.0 and everything necessary that enters the market such as computers, telephones and other accessories that give way to robotics.
(That would be the most complex form of engineering)

The Secret Casting
Monday, July 5, 2021
22:05
It is about doing a secret casting cycle in which they will all be televised.
It's simple there is a call for artists.

Then a secretary helps him (all filmed) and tells him "what movie you would like to experience" and what music. And she tells him to go to the studio casting.
When it happens you see a very wide screen like when we open all the internet signals. And a voice-over tells him "pick up the movie." Pick up the music." Then the lights turn on and the voice in off tells you to recline comfortably. And she sees and hears what she asks for.
Then the voice says thank you very much and the artist leaves.
When you leave through the other door there is another secretary with a microphone and she asks you. Is it nice to die like this?
The joke is going to be in what the person says (improvised)
Prior notice is given signed by a notary public.
Artists must be paid for signal promotion. And you can take many deductions for programming.
Open to all countries.
Estimated time by artist 3 minutes.
PayPal
saygraciasporeducacion@gmail.com
P.S. Not only artists but also the general public who wants to sign up with the complicity of a relative. (Make cycles)

The $10 Business
Wednesday, July 21, 2021
15:03
So you're doing covers and getting paid is what I think is wonderful. Did you

know that an author doesn't earn much and no matter how good the intention is to be able to pay you as you deserve, sometimes he can't or maybe he can. The world of music has authors and performers. So as an author I would be ashamed if they played my song without charging you or me. A coverista friend enlightened me on this. But what if when you upload a cover advertising an artist there is no doubt that you will at least count 10 dollars plus the donations you receive from PayPal and making the author sell and pay you for every time you sing a song to him. Today cover people sing and promote themselves because they like the song (I even did covers
when I was an author) So what I'm getting at is that the business is establishing contact with people who will pay you for your work. Because after 40, for a cover artist, we are old and the good thing is that we can pay at least 10 dollars for you to perform our music. First the money in your PayPal account and then you redeem it. Of course, first you have to promote yourself traditionally. But start professionally so we all win. Sing the songs in which you know it will benefit the authors. And then put your email and your payment link so that your fans can also contribute. I already said that being a fan is also a business since being a performer or author can help good causes. Platforms such as YouTube allow you to do this. Then let them advertise otherwise they don't win and there is no business.

So putting together a video 10 dollars payment. You have the money so pay a percentage to YouTube and the author is satisfied and can sell more. Artists even have to open up not in a competition (not like a horse race) but rather in a work environment.
It's hard for all of us, the authors, it's hard for the performers, it's hard for those who provide the platforms, it's hard.
So definitely what I am proposing is that from a minimum sum of $10 we can start paying the performers so that the authors also earn, so the author is also greatly benefited. There is no obligation to do it but it seems the most appropriate to me because the musical situation is no longer there to achieve your goal or the ideal is musical culture and the musical manifestation has to have a value if it does not have value you cannot give the money away. to the street but the money must be deposited with someone we authors like so that they can sell us our music and so that we all win. In this way, then by making many money transactions, the musicians begin to revalue themselves again and what this leads to is a boom in culture again. And surely for the younger ones who will come, it will serve as an example to be able to promote their work at a social level in a paid way, which can be applied to other areas such as cinema, theater and television.
or anything that held me back, you know that there are also many businesses to do and I again insist on what is the deposit

of $10 plus $10 plus $10 and then the investment in other jobs and in other industries then ultimately it begins to move to the market again.
So that way the market can finance new artists, old artists and those who are in dissent.

The Millionaire Worker
Tuesday, June 29, 2021
00:35
People who go to and from work every day by bus or taxi or in trucks and the little ones
Merchants also have the option of having children and becoming millionaires. Let's think that today anyone can open a savings bank account for their children. The day they are born. And although it seems that it is going to be
It is difficult to adapt to a new economy.
In most countries there is a public school so the costs of studies minus supplies are borne by the state, all taxpayers, which is administered by government. So what you have to start doing is the savings account. This is giving incentives to children to study. Some may be paid more and others less, but what matters is that they, throughout the entire stage,
learning lasts to be covered.
Suppose that a worker who works 20 days a month and earns 30,000 pesos and saves 1 day of his work for his son is more than

1,500 pesos that, converted to dollars, can be put into
fixed term, that is, generating more profits. At the end of 14 years of studies that is $170,000 for your son who graduates from college. And I'm talking about the smallest salary of a laborer. So now he has a
professional who can do the same with his children. So how did we start savings accounts because it takes many years of effort and every time you go to the supermarket you save 10% of your purchases and your
economy will not be affected. Instead of buying a car, travel by taxi, which is cheaper. This in a period of 14 to 15 years. You are even saving yourself from having to pay for very expensive private schools. In this same way
Make a box for your well-deserved vacation every summer. So if you have a child who is twenty years old, after doing these steps, your children will appreciate it and you will be able to do pending business. Work with your children. You cannot choose the destination but you can choose the backup. And it is never too late to start even if your children are young or adults.
What I mean by the millionaire worker is that his son, upon graduating from a career or a
trade and does not have business plans, you can invest the money in the bank for a fixed term and also invest in income by buying apartments. Parents have to make

this effort too, which is the effort to be
father and show them the best life and the best path. In twenty years the family will be millionaires. Then the social position improves thanks to the effort. No marital breakup should break this pattern otherwise there will be
losses for the son. From the beginning, the family has (apart from all others) to consider this objective as a goal. Then they will be able to do other things that wealth will allow. Children always with humility
They must respond as they did with example and dedication, being a role model for the next generation so that no one instills in them that classic thought of making my son the best at this or the best at that.
Demanding too much. Leaving everything in the hands of teachers and professors. And if there is a problem, go to a psychologist or psychiatrist. Then society begins to manipulate them and they stagnate. Others with thought classic they can also be true but they don't seem happy.
All the rich people do the millionaire worker thing. If the working class understands this book, they understand that they can also achieve it.
The family is where society begins and that nucleus has to be united and strong to be able to face adversity. Then we make a better and secure society like in developed countries on the sustained basis

of respect. So looking for prices and discounts is a positive thing. Healthy eating and hygiene habits. Never be harsh. Despite everything, they will choose their destiny. Above all trust. They do not exist
perfect parents but make an effort and support our family so that our children also realize our sacrifice and then help us. It is not a question of ideals or philosophy, it is a
task of life that must be made aware of reality and not expect misery. Expect progress with education and respect and money to back it up. Then you can think what you like. And keep saving and investing. And don't forget to surround their children from their good friends.
Miscellany
Everything we teach, others imagine how it could be, that is why they change.
ideals of the human being.
This gives us reason. Which allows the normal development of both parents and children.
Tell your children the wonderful things in this world and then they will go out and find them. Because
They will be your utopias. And yes, you can work with parents.

The Empress
Thursday, June 10, 2021
02:14
Based on a true story.
It has been known that the emperor who built the

monument to love in India called Taj Mahal was locked by his son in a dungeon given his madness over the death of one of his wives and the most favorite for him then the fundamental idea of ??scripting the empress would be to give a change to the story and that
They have hidden from the emperor that she was still alive that would be the fictional part inspired by a real event and if it is possible given the conditions to film it in the Taj Mahal itself and it may be not exclusively but an Indian film and co-production.
Legend has it that that emperor walked through his Castle having his parties among women, among wines, among friends among the highest hierarchs of the court and lived a very happy life. One day, out of envy, his son, upon seeing so much display, came up with the idea of
Call some wise courtiers and ask their advice to take the throne and thus be able to make life for his father. Then, among the women of the kingdom, he chooses one and exiles her from the palace and sends her to the distant outskirts without being able to have contact with the emperor. after this
One day the emperor, after his celebrations, takes a walk through the park with one of his women and asks her about the empress, then this woman confesses that her son had exiled her, then this great emperor falls into anger and starts with his sword. to destroy everything that crossed his path burst into a state of madness, then his son,

upon seeing him from a main balcony, ordered the guards to imprison him and then he was imprisoned and his son's government began in the reign with one of the
women of the palace who are going to betray him but helping the empress who was in exile.
So where do the festivities begin in the Palace with guests especially courtiers and others
rulers who mocked the emperor who was imprisoned on an island and slowly deteriorating. This son is not happy because he does not have the love of his wife.
On the other hand, the empress in exile begins to write letters that
They are always censored by the leaders so that they do not reach the emperor who thinks she is dead.
Then the empress begins a plan to call friendly warriors who had also been exiled with her but to other parts of the world.
reign and they bring them together and this is how the journey of this empress, the favorite of the emperor's king, begins and they begin a series of hand-to-hand fights with swords and power against the empire of the King's son and finally the empress wins the battle due to what gives you
true information about where the enemy troops were.
In the middle of the party at the Taj Mahal there is a kind of torch fight and they kill the king's son and then she

looks for the pure women in the sacred temple and asks them where
There is his beloved, then among all the crowd that is fighting, he takes a secret passage and goes to look for him with great anxiety. After about 10 years of the emperor's prison, he releases him, hugs him and expels all the people from the kingdom.
friends of the son King has died and they form a dynasty of love so in that way the empress returns to the emperor and they begin their old life with their dances with their wines with her friends with reunions in a beautiful landscape that had been sterile
for a long time and that they manage to recover, sources do, so this story ends in the two seeing themselves happy reigning thanks to the bravery of the empress in the Taj Mahal, the monument of love.

Wheel of fortune
Thursday, May 13, 2021
00:47
It is designed for female presenters.
A game
A wheel and a girl on each side.
It can be a super vinyl record (white)
It would be based on a hoard of text messages.
The wheel spins and a number comes out and instantly there is a winner who is

credited via bank transfer to their account. (PayPal) The difference with other bets is that the
People have to wait to get paid. Here you pay.
Bettors must leave their information.
It must be at least weekly and during the period of absence of the
program you can send unlimited messages and this goes to a database so that when the bettor gets it right, the money is multiplied by the number of SMS and they win more.
It is designed to be international and the population can see the benefits of using PayPal. What in the batch can be advertisements for this online bank as a sponsor and then the
business owners that is what they offer.
An advertising agency will take care of this. (I suggest Argentinian presenters) although it is designed in a global and usable sense.
format for any country. Although the wheel is the main game, they have to play games of chance. Letters, for example.
Daniel Triunfo
dantriunfo@hotmail.com
Alone and alone
This format on television has given the best results in times of crisis.
gas tankers
It is a reissue of a classic like poliladron. Since the times are similar.
It goes for you
He would also have to return to the screen to make new musical proposals.
Saturday matinée

With films for the general public that
can be new or classics.
A philosophy program that aired on
Channel 5 with Peter Capusotto. And
Prestico.
The River Plate comedy programs.
Marriages and something more with a new
cast.
Decalegron with new cast.
Plop with new cast
Hyperhumor with new cast
Notocaboton with new cast.
Calabromas (if possible)
Programs for children like cacho
bochinche.
They have to come back, let's talk about
the porteñada scene (for radio too)
There is a lot of human potential and
producers, just as Don Mateo's hair salon
is back.
You have to cast talents.
Distance football programs (new)
(Creative ideas in my books "Find you"
and"
when we look to the future"
A talent like Fito Páez has to be born.
Programs like big brother.
I remember the success of the sport and
the man.
The classic happy Sunday for youth.
A new Xuxa.
Televisions to plug in speakers as you
hear in the cinema.
Programs like Aris Iriarte's mirror of
tomorrow. (Radio)
The stay.

A program that would be a success is to make great values ??of tango (with the current high level)
The afternoon comedies.
Note: In memory each producer will have programs that they can carry out more easily and that can be
escape many successes.
I propose creating ESTUDIOS UNIDOS DEL SUR to make films or advertising.

The Org Theory.
Monday, July 19, 2021
21:55
Some time ago I heard a former president say that "Being
human, he is a sociable animal" which I found contradicted with Socrates' saying that "man is a political animal" and I downplayed it.
At the same time, I think about why man is a sociable animal.
According to Geology, the ancient world, that is, the continents, were united, which is why it occurs to me that in times far from the present and modernism, things were very similar to today.
Then I thought of the Gods who came and They tried to explain to other human beings why those phenomena that cannot be understood at first glance occurred.
In my opinion, the first God there was was the one who taught how to use the word. So the word served to
human beings communicate better.

Then the understanding was such that the human being himself adapted the dialect and then many more Gods came to this day.
All cultures knew God and
all languages ??knew him.
Then these Gods made restructurings on Philosophy, which in ancient times were all the sciences. So let's say that God was the first man to use the word to establish a
organization (or a tribe)
A philosopher said that if "God was an invention of man or God had invited man"
It is clear that these primary philosophers who were called God were trying to explain the causes of our nature and it is possible that they lied or perhaps they were right. But every time one or several of these wise men came into the world, they reorganized what was popular for the development of the people.
Then, since the tribes did not understand each other with words, the conflicts began.
wars that we still suffer and the plagues that we still suffer. But something always comes along and there is a reorganization. Even after the wars. The atheist can make an omission from the God or Gods who are in "heaven" but not an omission from those who
They lived and live with us who are Gods.
So to understand these times that pass you have to understand the theory of Organization or reorganization. Nowadays young people come with more information about computer language

and surely when they grow up they will have other languages ??that are incomprehensible to them and there will be reorganizations.
So if we analyze a little in sociology we realize that we are organized as we grow in society.
society. For example, a person who lives alone is organizing with a cat and they are going to be organized with the market and with their neighbors and with WiFi networks and likewise all organized within cultures and subcultures and everything is in its perfect order and balance moving through the cosmos. And the animals and the plants and all the sciences there are and everything that our senses capture. Whatever you think or speak, whatever you speak is organized. That is why anyone who is capable of making a chemical solution that combines the oil with the
water will be able to live naturally in the sea.
That's why the world is always organized and when it's time for development the world doesn't change much but it doesn't change alone either. Without wanting some and believing others, the times are reorganized
in which we live and each one is free to choose a model of the old world or a model of the new world. But the restoration that must be done is so great that it is better (within reason) that the greatest freedoms are given, thus ending with a story

sociologist already useless and full of lies given the great disorganization that existed in previous centuries that served prodigious thinking and then modernism. A long time ago a friend told me don't try to understand
(who was going to understand it at the beginning) That's the internet. An organization in which we are all with a new language that must be understood. In my opinion to contribute to the development of an "Esperanto" in code. That is, soon so that there is good communication between the
Human beings have to make it simple as it was done in ancient times (2000 years ago) who played with words and numbers. To put it simply, the new language of the Internet has to be accessible to everyone. (Then there are no left people in the middle as always)
The new language has to be written with letters and be codified and it has to be with numbers, that is, if they want to say a word that has its number, that is how all of humanity can understand it. That is the theory of
organization. It is easy to make the code is 1 A, 2B, 3C, 4 D, etc. So the one who knows how to make letters writes numbers and the one who writes numbers letters (precisely because the continents will be united). And in that way we all meet and understand each other and
We work and we are happy. Because we have combined the water with the oil and everyone with the sea. It may be the beginning of a new technology and then

others will follow. That's the Org theory. U Organization (near near world)

Everyone to Pray
07/06/2020
22:40
Television program for 12 noon.
Format
Driver who tells current affairs jokes.
Mime space with Pastor Gegeles.
That solves the problem for divine mines.
Space for a supposed recruitment agency.
"An agency that asks for ideas"
Then a space for celebrity reports.
"anonymous beggars"
This space is to ridicule the networks.
Music space contracted with YouTube. Due to the rise of musicians playing via videoconferences.
Space where you turn on the radio to see what is happening. (call the radio from the program to play a certain topic)
Everything of course.
The fashion show with beautiful models.
Space for soccer (kicking the goal)
What is sought is comedy at a time when people want to have fun. Projecting for the future.
The premise of "everyone to beg" will be precisely that in order for things to happen in each segment, everyone has to ask, insist and beg.
Some things happen that night otherwise you have to wait until the next day.

And a chorus of all the participants together" and what is said" and another tribune says" thank you"
Driver" until next time and everyone to pray"

The dealership
Sunday, January 24, 2021
02:46
1)) Virtual vehicle appraisals
2) Camera in parking lots (especially supermarkets)
3) Promotion of change on the spot.
4) Global level.
5) Client file.
6) Custom promoters.
7) Test new cars.
8) Make a place in supermarket parking meters to ride
vehicle exchange companies.
9) Each supermarket will have an employee (male and/or female) who will cover the parking meter. (Tracing close to the client)

10) An application must be developed that facilitates the processes. (By annual Google contest)
11) We will work with a zonal public notary to
make transfers (purchase and sale)
12) The working capital will be the associated parking meter.
13) It would be like expanding a branch within the firm.
14) Automotive companies may associate
15) The business is that there is someone agile (it could be a mechanic) who makes the sale on the spot with two
effective assessments. Or a sale of a new one.
16) Commission of 15% profit of 300% for the concessionaire.
17) The attraction in sales times that have to be fast will be in boys and girls washing cars American style.
18) They film it themselves and upload their videos to tiktok (that's how they find out
all shopping friends).
19) In this way, the most extensive network for the purchase and sale of new and used vehicles is formed.
20) I learned that when one car changes, they all want to change.

Voucher plan from the 25th of the month
It is simple for people who cannot make ends meet with an 8-hour workday, 5 days a week, to work an extra hour per day.

That is, one more hour per week working 5 days a week and paying on the 25th of the end of the month (out of 31 days). That's 16 additional hours.
In the average poor daily wage it is 3,200 extra pesos (earning 200 per hour) until paid on the first days of the month.
It is a form of voucher because it is worked.
It can be applied to everyone without distinction of salary. And more work and more consumption and payment of debts such as credit are achieved.
It has nothing to do with overtime. It is one more hour of more work for the voucher on the 25th of each month.

Versailles

I put Versailles in the plan because at that time in France there was your garbage dump that my history teacher told me about and that was transformed into a palace with the best influential people who all lived there and from there managed the entire state back then a long time ago. I have been handling the possibility that the most deprived places can change reality even more and I hope to be in the seat.
I tell you that every day the number of people on the street grows more and more in the mouths and other problems so the reform is very simple in those places there is the workforce and with this we

start but first we have to achieve investments and I know that now through the kiosks that raise lottery tickets and that goes into savings in parts to make a games room and rearrange the environment so that the same people who live in the area or who are occupying land from the general public can work, that is a true marketing study. That after having counted the money, which is a phenomenon that does not only happen here, you can start with the works with the same people who live in that place and improve their house or do it again and work and work for a so-called raffle in the casino.
Meanwhile, the lottery management wins the kiosks that invested and the workers who were able to make their homes decent, no longer go hungry and have decent work.
In the surroundings of the settlements there may already be established sales premises that can be attached to a work close to a shopping center or a small shopping center, which would provide people who have to negotiate better or grow a little more or I think they want to invest In these new shopping centers you have the opportunity to do so.
Of course, with the consent of all the authorities and the relevant neighbors, what are you going to form Versailles, what are many places going to do to work to help and raise the country further and I remember that the fundamental thing is to raise funds from the moment with the kiosks that raise lottery tickets and you can also add a clothing store and other

things for shopping and you will see
better what to do.

Original
Daniel Triunfo
saygraciasporeducacion@gmail.com

P.S. And I am in favor of the new generations being more educated without that hatred they have of living on the margins and so that any of us can walk freely on the street.

The gesture

I had an aunt who didn't love me very much.
I lived in the same house when I was a teenager.
Through my father, she spread the word of many things that were not entirely true.
Until she hit the nail on the head.
She said "Daniel is unable to lift a plate off the table."
And she came with the phrase to destroy ties since it was thought that everything else said was true.
Today, after many years, I live with another person who complained a lot because I lifted my plate off the table, which led to disagreements.
Today I remembered that when I was a waiter I lifted a lot of plates and then I discovered today when I lifted not only my plate but also the other person's lunch plate at the same time.

I felt peace.
Moral: They can say anything about you but with a simple thing you can change the minds of one or many people.
If you know what they complain about, you know the curse that you must repair in a simple way. A gesture. Help…

Free Card

When we are children or minors with parents or a guardian, we ask for a lot, that is, in gifts, and the people in charge of us also promise us things like moving away from having a car, a bicycle, etc., which means that we can choose between things. that can be given or not or put in a savings account all the unnecessary money in quotes for things that may be useless what is the old piggy bank I can take a larger plane that is to say that when our child is born just as we become partners in a football team, we founded a fixed-term savings bank account to generate interest, then our son grows and let's say that we fill his piggy bank so that when he turns 18, he can use that free card that goes away to give the tastes of any teenager how to build a car, a house and have the ideas that occur to him when the bank grants him the free card he will have all the benefits that will be worth waiting for during his childhood and adolescence What it does not mean is that parents or guardians are

buying other things, Christmas gifts, birthday gifts, etc.
So when the son grows up he will have the option of marrying with a good standard of living which will make the circle again when he has his children to contribute to that piggy bank and in addition to having his job and continuing to earn money which will improve the quality of life clearly of the society that wants to incorporate it or of the family that wants to incorporate it.
So who at 18 years of age wouldn't like to have a free card, which is the card that the bank will issue for the fixed-term savings account.
It was what happened when people were getting married that family members, friends, loved ones deposited money in their account, so looking at it from that point of view, it is guaranteed that it is effective, so the bank of banks will be able to make movements with the accounts. savings while you are saving and then the saving too. So the more you save in the account, the more you will earn. If we start to think about how much money our parents spend on education to give an example of English that is not going to work for us, it is just to give an example if that money is stopped by saving so that when that person is older they have the good of having a card at your disposal and be able to continue studying and with an incredible advantage and the best thing is that you will be educated to pass it on to your children and thus generate a fully profitable

circle for everyone. And then the free will become a classic and cultural phenomenon so that those gifts that do not seem important with a free become a reality and then the social circle will follow. I say free because it will seem like everything is free.
Transactions are now easier from a cell phone or a computer. The best gift that can be given is to show our son that we are making the transaction to his account, so we are promising, but really promising. This example can also be taken for fixed rate savings for other cities and other social purposes of some financial dependence.

Chat
There you need is Love

Some time ago I was thinking about the advertisements of the night to do it in the most appropriate way and this idea arose because at night there are usually lonely people listening to the radio and

then this phrase from John Lennon occurred to me all you need is love what would represent the advertisement of a social network at night that is on the internet or the web as you want and then those people who are friends of the radio can find themselves, that is, the listeners on a social network while listening to the radio and the Advertising that occurs to me has to be mild and for the occasion as well and that's where all the business is done. The official voice of the radio can then announce where all the people are and also, although music is very important, place advertisements with the world of the night, such as hotels with high turnover, means of transportation, so that people can find each other. entertainment venues bolites etc. whatever occurs to them or what can be captured that is the same people say it in the chat but in the chat although you can open a page and do it the listeners just by listening to the radio will give ideas for finding advertisers, this is because of the great loneliness at night and I don't know what the chats that are already being handled are about. I don't intend to go over anyone's head, which is why I want to add this form of work that I It seems that it can be fruitful and good and finally let the night come to life, let's say.
In short, it is making a chat for the web through radio ads for advertising on the radio and on the chat page for meetings

of people who are in tune and this would be the program of the night.
The intention is to help people who are alone and it would be like a sun alone but a little more modern with the name of the radio más love to give an example nothing more and what worries me is moving the night market because there is enough. Well friends because you are friends I leave you this invitation to have a good time and have a good day,

The brilliant idea

It's about making a format for long-term television.

People of all ages can participate if they want personally or in groups, they can be students from a retirement home, a group of friendly neighbors, etc.

The methodology, although it seems a little complex, is very simple. What you have to do is call via the registration web form, briefly detailing what the program is about.

It never occurred to me about the difficulty we have in putting our products, our services, our ventures in the market and it gives so many people with a lot of willpower, it occurred to me to make a great idea that is the

winner and can be done generation after generation. of programs.

There are examples that will come to mind but this is different from helping people to capture their best great idea or simply hoping to win.

So what we do is have all the new items and rubles that can be implemented even with the new generations of programs ideas to translate into the market,

The great idea was born from a moment when I thought that no one was helping me, so I said, well, I have to cover a great idea and it's great to me. It was that they knocked on the door of my house and offered me money to survive, but since this is not possible it occurs to me to make an idea for everyone from all trades from all jobs someone always has a great idea and it's time to bring it to light.
Then invitations are made through social networks with a short form to fill out for the participants, that is, from what country, how many are there, if it is a group, is it individual, address and personal data, and in the end, the most important thing is to make a long video. 30 seconds to a minute saying what a great day you have.

So the next step of the production is to take great or not so great ideas but they all serve to make a long program where people find good entertainment for

Saturdays with excellent and fast driving and then how do we know what People want to take a group of people and we start to compete so that that great idea can be developed, which could be with a mentor chosen by them and then the categories because a youth category is not the same as an adult category, the competition as they are. the competitive programs where the great idea is going to be developed and those ideas are going to compete for their realization and then make ideas a great idea.

Then every year as generations change, how people change clubs or how fashions change, the great idea is made again with another call.

So the prize is that the realization of the product is a service that the venture will be financed by the production company.

Then all the scenery and also if it is going to be to stay in a television house or something more in a small studio and for people to show their ideas, it is most likely that we are going to find an entertainment program that can be comedian that can be artistic that can be football and that entertains people. And the best thing they call advertisers. When a participant enters, they have to sign the rights to the product to be marketed later if it is a great idea.

So this is my great idea. When you feel like helping me a little, please, I will be very grateful.

How to make money
money being a writer too
you can use money being a musician you can also make money by being a politician and you can also make money with a trade and you can also make money by moving up in any job
but what it is about here is how to make a lot of money in
You can make January playing football and you can also make money by being a public employee you can also make
less time but it is not as complicated as it seems so
cio
In our minds we can be suggested to make money in many ways and all of them are valid for many subjects and an extremely large market that

sometimes exceeds the limits of
what we can really do.
Also set up your store or a
self-service or a supermarket
with a small loan but what you
have to know is this account,
that is, 100% is invested.
Then you place 300% above
the cost and sell it, then
there is 200% left, 100% of
which is money to invest and
thus progress, so having this
calculation you will always have
money left for you and to invest.
cio
moment we can start really thinking
about how to make money. The idea
of the product always appears
because we see it on television, we see
it
on
then colossal written up
internet and then we look for the product
or we make it ourselves, which is more
difficult because we have to work with a
team, that is, if I want to work with
leather and make a
Because if our being wants to sell
crafts in the plaza or wants to live
on the beach with a caipira stand, it
is also viable how to make all
this simpler, but many will say no, I
don't
want to do that thing or do that
job.
cio
leather clothing line
What I have to do is buy all the

leather that is possible, have
it made at a construction company
and then print my logo, my brand
in another place and that way
the product is finished. So what
we have to think about now is
who are we going to sell it to and
this You have to pay close
attention because the name of the
product is essential for the sale.
For example, you may wonder why
I put rental clothes on all this
leather work and that's how we
start with the mind.
We have online payment
services almost if you read this
business. Now we have
stores on the internet
cio
Running a business and with the
technology that now exists, you no longer
have to go crazy about collecting
money and it's just a pos. And when you
have to buy, call the supermarket and
make the purchase you have to
make and when you have to pay your
house bills online, then we already
have a business there, which
will take you 8 hours a day of
with the cell phone in hand he will be
work and the most important thing is
to be enrolled in a retirement
fund, that is, to make the relevant
contributions because let's imagine that
one day you will no longer want to
work no matter how much money you have.
easily and without leaving your home
cio

start you already have to see
So let's imagine the number of products
that we can make and that we can sell and
the number of people there are
be able to work or derive our jobs to
achieve financial success by helping
others
people and in the best way because
that is what being money for is all
about.
not having to profit from other people
and also live with dignity. It is true
that
to start we need capital so we can
sell things that we no longer need or
also take out a small loan that can be
paid in a year with the ease that will
be
be selling Before
cio
live without the other.
And do the numbers
and calmly start thinking about
the business by making links that
can be in a social network of yours
friends. So I already have my
business, I'm already selling
wallets for rent, but for that we must
don't forget about all the service
that I need, so there we realize that
the product and service are very close
and that practically one cannot
But also to make money you have
to be informed about the prices,
especially because before you start
selling or even
The competitors that you will have
will have at least five.

cio
take out a loan you have to see if
thing how to make lighters
It is not use bringing wallets in this
In our country, we then begin to compete
with quality and price because we
can sell a higher price for better
quality, but
what matters is the brand because the
brand is what calls and then it has to
make
advertisements, which the agencies
practically take care of. All you have to
do is sell. And you know how you get
started after selling what you don't need
and reinvest in any
small crafts and from there the capital
is
formed then following the rule of not
spending
case of China or make them in
cio
informed about how my
So only now what remains for us is to
imagine what will happen to us.
way and with the same technique as
used through the Internet. I have
technology to collect and I also have
technology to sell and I also have
technology to pay and I also have
technology to be
business and it is not complicated at all
use this technology.
All we have earned, but half, we
are making the net capital so that
when we have it entirely we can do our
great business, which was everything
explained above and do not rule out doing

it the same way.
cio
do you like it I imagine? Well, that's what you have to sell until everything has been explained before how the business is done, so with that imagined you have to reread everything again and then you will draw another conclusion.
Let's say the new industrial one and then that's what you have to take advantage of. Then, as we know, the services are there and you will be able to
organized and detailed of what it is going to
be convenient for you to undertake and how
it is going to be to undertake what you already
great help from the technology of what is Google that we can search for the infinite number of products and services and prices since the revolution is almost done
It is detailed. So with this

pay for the money from your sold product and others will make money with the money you earned but it is the law of business, true.
So after having made a significant capital you can expand your business and have it in a physical location and continue working with trained people or employees who will help us make the business easier even with ideas or

with whatever you need and
make a call and With the number
of people who want to work, you
will be a good person who
will provide decent
employment to others and them
will be grateful and will work
happily and for that there is
a personnel selection company, so always
try to
cio

Schedule production
Production towards 30 seconds can also be
called winning.
Entertainment television program to
promote good
advertising and the various ways there
are to carry out the task
designated. With a presentation of the
participants what they do
ages, hobbies and what they are
passionate about doing in advertising and
giving them
forward and upward because they are going
to be the participants in what
They sell a lot and will surely be big in
the industry.
They saw that now the whole world of
social networks tries to
advertise in various ways is because in
some way they feel

attracted by the advertising medium.
Then the idea occurred to me and I'll tell you a little bit about it.
how diverse participants in groups of four or five
people with a presenter are going to be given an advertising task
perform with a Jury and with an audience.
Tasks can range from graphic design, modeling,
interiors poses for photos cameras voice-over writing and then
having four groups per program with an advertising task
designated by an agency we obtain a product that can be like this or
the same advertising can be done more professionally and what does it mean?
wants to achieve with all this is to demonstrate talents and accommodate
within the agencies that have to sponsor it and other truth to
let them work and then it would be rounds until the group arrives
winner.
so the reason for the program more than everyone would learn to
advertise as is being done momentarily and this
would implement the new forms of advertising that will come much more
forward, taking precisely for example the productive initiatives and
From there, we get important talents to take into account throughout life.
the agencies.
So let's say that any company that approaches an agency

advertising or a radio or television is offered there is a client if
you want it to go through program production or be done at the level professional
The prices will be seen by each channel according to the estimated number of minutes that
advertising may take time with or without production.
production and the advantages are that production is going to give you much more advertising and screen and more minutes to your product or service or else
in the traditional way and that's it.
Let's imagine a set in which one presenter or two presenters
man or woman or women or men approximately 30 years old
good experiences in the commercial field with a good wide
screen at the back very neat and with very good scenery and lighting
that they treat the participating boys well can also be with a
small stall where the public bounces or the public directly
boat from their homes or from social networks or by WhatsApp and what are you doing?
afternoon hours to entertain people and have tables where
participants can meet with a computer and begin the
production of advertising and then takes turns with another group
of kids, preferably university students, and that's where the

rounds in a serene musical environment
what I mean is without that
expectant tone that moves the heart, I
personally don't like it if
They may well implement it in some cases.
So what we get apart from public opinion
is the product
or service is a large group of people
talking about the product and the
service and then from there what we
achieve is to sell it.
Original
Daniel Triunfo
saygraciasporeducacion@gmail.com
The renaissance of music.
The work consists primarily
in contacting musicians through a
advertisement towards a platform that
It can be public or private and
from there write them down in a musical
category, that is, a
musical genre and that form take
a demo to make performances
live so the format would be
video or, failing that, a video
existing.
The second step is when
we already have the musical material
we gain an important step
because that is where the entire
structure will be based. We all know that
there are many
producers who want to become many
theaters
many theater and movie theaters and most
importantly
the public and even more importantly

It's going to take a while to get to know
this whole campaign at the local level
and at the
global.
Then with a presenter in a
theater with good sound and a
musical genre to put a
example and a production company films
itself
with a format for cinema at a
important number of artists
between 20 and 26 and that will give us
the duration of the show then
We began to have income in the box office
and began to
solve distributed expenses
equitably since it is a renaissance of
musicians and
How do we know when there is a
renaissance of music there is a
renaissance of all others
products then true.
So we have the material to
cinema that has already passed through
the theater and
we start doing functions
It is also the large number of
cinemas that are there then
Let's imagine the large number that
there are due to the various genres
that the public can visit and
with the peculiarity that the door or
the ticket office can sell
DVD or CDs and then win the
record companies for the distribution of
the reproduction of material for
so that's how it's done
legal.

This is a meeting between all
the participants appointed to
encourage music and do, as I said, a
renaissance of that
so that you will have the
ability to carry out studies
market and a good advertising campaign on
television and
radius but in this case it would be a
discredit that this was seen in
television or other digital media since
there is too much of that and what
What is sought is novelty and
precisely what cannot be done
see in a simple way.
And then they will begin to be marketed
at the level of
different countries that have taken
the initiative so that the public
get to know the culture here and the
culture there and of course to
make money you need so much
makes musicians.
This can clearly be done in any country,
I base myself on the
mine and the rest will see the
opportunities you have at your disposal
scope to develop this
project so that later the industry comes
to market other
products then you have to be
pay attention to that too but for
there is time and you can go
seeing how to be a range
important household appliances
for music that you will be able to find
in big houses. I'll be honest what you
looking for

this venture is the
inclusion of musicians who
they should have been helped
in times of crisis and that they were
given
the back which is my case
I also say it, I write for love and
wishing the best to
everyone and I like
jokes but with hunger you don't know
play that they should know so next time
they need you
a hand remember that I
I told them if we won't continue in a
circle of the great depression
musicians.
This would also move the market
of the recording studio rehearsal rooms
and the most important thing is that
there can be advertising among
middle functions and function
each artist. then they will all come
the movies of everyone's life
musicians who passed by there. And the
More importantly, we must make categories
of minors
older than youth I say it for him
public because sometimes the public
may be young and want to see things
young people and the public can sometimes
be happier want to see things
Older people don't all listen to it
same nor see the same. Did you notice how
everyone can be?
They can also be performed
lectern awards for the most
heard. I know that many
are going to use this project with

benefits for themselves and
can do for a few and let them do it as they always do
to do but good people and
like art pause the good
criterion and good judgment to achieve
expand culture and economy and
Don't forget to register your talent.
The renaissance of music is imminent.
I hope you like it and that you don't turns out a treble clef.
Greetings
Daniel Triunfo
saygraciasporeducacion@gmail.com

Travelers Card
The possibility occurred to me
that there is universally a
card
for travelers or of travelers due
because there are many people inside the country and outside the country how old
only for business then
I know
happens to make a card
debit travelers which can
use in any means of transport, be it the plane in
cab
by bus etc.
This can be done in all
countries joining efforts with
ministries of transportation
have a single price within the
currency that would be the dollar and then

transfer to that currency of your country
where you can avoid the card.
Although there are cards that cover the
travel there is no card yet
specific for such traveler option. So
what they get this
subscription or this card will have the
possibility of working with more
dynamism and of course the
people who do not have a vehicle
It would be very good under the ones
They are left without a vehicle. So
organizations that tend to travel more
frequently this card will
would also benefit the bank or
the banks that issue it given
that has no expiration date or
whether the client would be
benefiting in real time. then let's
imagine the great
amount of
people who are traveling within
his country by neighboring countries and
by
world the issuance of a debit card would
do you a lot
easier
and it would save you papers and
would manifest as a visa since
the cost
I think the
obtaining the card. So
travelers would benefit from
effectiveness of the system and that
way not having to handle cash to risky
places and
so
ensure that your trip is happy and

pleasant and above all the people
that
you are going to sell products within the
country have the option to choose
traveling by bus or traveling by
plane since the card will give you
that option would then move
more to the market and the sellers
They would work much faster and
better and it would be solved
many
obstacles such as
footballers passing by traveling in
the
artists who pass by traveling to the
people who sell marketing
happens
traveling to cable TV sellers to cable TV
sellers
estate
even those who go from town to town
a town selling items that
HE
They matter to cities. Anyway
would be a productive card for
he
work and for the traveler there is
to agree
ministries of transportation or the
ministry of transport if you want
that
be within the country. So
people who have a circle
limited
could be expanded with that
card and achieve much more clients and
also use it as
recreational.

It is recommended to hold a conference.

The products
Continuing a little with the
project groups it occurs to me
move to a larger scale, that is, to the
level
industrial recipes that all
families have or all
people have it or if they can't
find in recipe books or
on pages like making montevideo.com
because the
reality today is that
person has a great product
so that it leaves the market and
encounters obstacles or because it does
not
you are lucky or because you do not know
which way to go and it is not
simple but it is not that some
few can do it but
Now let's think that every
entrepreneurial person can
achieve it. For this you need the
recipe, a canner and a processor, those
are the three pillars and then the people
who have a premises or a space
inside your house for that purpose it
will go faster but let's not forget
everything that must be adapted
for said venture
because not everyone is going to need the
real estate that others are going to need
due to the size of the properties.

equipment then the company should be consulted
established that provide
solutions for space. Now it
What we need is a team of
solid work you have a
van for delivery better and is ideal for couples young or not
so young that they wish
start your own business this
I already told it but there were some
guidelines to know because if the
product does not have a study
marketing the product will fail
To give you an example, I had
made a beet juice and
I took him to try everywhere and he
juice failed because it was with sugar and
the public wanted it without sugar
then in that little
disadvantage the whole project failed
That's why I say it takes a
long study of marketing and
also have several recipes
to have plan b and so on
find our product and
market it to someone who
be good for your accounts with us, never discarding a
loan to start because now what is going
to be wanted as it was wanted before people
They bought juicers to give an example of orange or
sandwich making machines
hot and all that was a step

of machinery so that our grandmothers who had a room full
that was given to everyone
appliance birthday cook them better then what
I pretend now it's the same
but if you want to make churros
you have to have the machine
churros was what he told me
there is no churrero on the corner
secret you have to have the machine
because everyone and more
generations that come from how
society is going to want to do these projects in the
which, as I spoke before, mentoring is needed because
I insist that it is very important
the campaign both the media and
social networks and for that they have
There must be a person in charge of
communication, that is, for each product, a work team. Is
essential to take advantage of all
the advantages that exist today
to work both at the level
financial and credit and forms
payment and collection
In the past it did not exist and was only
for some privileged one who now
surely it is much more
privileged but still doesn't realize this far. So how do we move to the market with new products?
will open new spaces to
networks and new spaces
diffusion taking into account the
times but now having

YouTube can be marketed
better or let's move on
tell how to do it and
sell it because if a person
knows how to make chorizo ??like
hamburgers and you have the machine and
make it do it you can also have a work
team
to market it to the
Supermarket.
So to conclude just
lack of desire to take into account
our competitors who
They can be our partners, look out there
and have the recipe and know how to make
it.
because let's remember that we have to
have the processor so be it
a dough like this is a meringue
Whether it's an oven to make a cake,
whether it's the detail of
the strawberries or the Santilli and the
most
fundamental of all this is
industrial packaging machine then
can make a business
import industrial packaging machines
also to sell it to the
enterprising people of the
products in the homes of
distribute household appliances and
another group is formed
entrepreneurs.
Already having all this data
we can start exporting and
grow which is the most important thing
of everything.

All you need is the call. Do you have a product for
market?
And there you have to say it...

Crazy
It is set in a block of
apartments where they live together
Maia the main character alongside
Sunday who is the other main character
with his four mothers-in-law who all work
at the same time.
prostitution together with her children
and
daughters of her.
First scene:
With a coffee in front of the
computer knocks on the door
Sunday
Maia: If it happens that now
I attend.
I have some complications here in
Facebook.
Sunday: Hello Maia, it's hot like you
can't imagine.
Maia: keep leaving it there, I'll come
What's up, do you want a coffee? I don't
know look
I smoke because I don't know if I love
myself
dress or undress.
Sunday: get dressed, come let's go to the
room.
Maia: what happens is that Mariana
Lourdes is your mother now

It seems like everything is busy
the day and they don't give me a ball.
Sunday: it doesn't matter, you see it anyway
every day there. If they go gossiping.
Maia: oh oh, you already warmed me up
Sunday we go to bed. Turn off the light, come on! Which for you is free.
Sunday: for you too my love.
The lights go out and the scene ends with a bell ringing.
in the apartment upstairs
where is one of her mother-in-laws named Lourdes.
Lurdes: I can't take these anymore
Heels go to Lucero to see who is capable of being a client.
Lucero: Yes, I'm coming, mom, it's not
the storm that's happening, it must come.
soaked and still I have to
dry the floor.
Lourdes: Oh yes, don't tell me who she is.
Lucero yes it is
Lourdes give him a pass.
While you beat eating well
loud and can be heard from below
the noises while the client enters
the Lucero opens for you and again the
very strong heels while
downstairs turns on the light and Maía says yes
what's happening? And she shouts Lucero is a customer.
And Sunday hello, let it go, the poor guy
is coming to work, I'll do it.

I know he was the one who sold me the drill.
Second scene:
On the side of the doors
opposite from above you can hear
like a flower the furniture runs and is cleaning the house.
Flor: but you two somewhere
unless they are of no use to me
I have to clean all day, right?
They see that I have to work.
Marcos: Yes, mom, but it's hard on the street, I have to go put the motorcycle away.
Flor: and your sister Matías?
Marcos: she spends the hours
down drinking mate.
Flor: that does get clients
Hey?
Down with Matías for the other mother-in-law
drinking mate or tea.
Jessica: Your mother is cleaning.
no Matías ah yes the clients
They always complain to me.
Matías: leave it like that, the old woman is already
She's going to pass, look there, she'll get you
a customer after he passes yes says Jessica.
Jessica: remember what
we bet Matías for less than
$100 what are they going to want?
Mariana: hello hello what are you doing
let's see if we can work a
little today what needs to be done for electricity and water.

As? Jessica already took everything from
me
the icecream?
Matías: yes, they came today
many clients but
we give the poor types.
Jessica screams: yes, I can
We are going to take him to a 5-star
hotel.
Matías: don't be so ungrateful to your
mother. (She also screams
other sector)
Meanwhile they are heard behind
loud music noises of people
moving people's furniture
installing things and shoes
heels from here to there all the
time that already has to be prerecorded.
Maia: shout out loud: what's happening,
everyone is crazy here, come and
work.
Mariana: it's not with you right now
Also on the other side is the
My stupid daughter eats all my ice cream.
She didn't see the heat, what is she
doing?
I just got back from the threshing floor
long I book six hotels and
you fooling around here.
Sunday: we didn't fool around here
here we sell.
Flower: what do we sell shouts from above
Maia: we sell meat and don't shout
more that they are going to scare
everyone
the clients.
Hey, turn the music down a little.
Jessica: cold mind old mind

cold.
Third scene
They begin to leave little by little
clients meanwhile sunday
raise the funds you
they belong like fiolo with a
whiskey in hand so he goes through each
department that is, all three
remaining and returns to her apartment
and Maía tells the
silver
Maia: and yes Sunday was done well.
Sunday: with this we already have
to buy the car.
Maia: with a coffee at hand. Yes you
I'm going to let everyone know that
tomorrow we leave by bus.
They open Facebook: and it says
Tomorrow we all leave by bus
the boys and girls can come
girls.
Mariana: where are we going?
Then all the ambient noise stops.
Maia: We are going to Brazil, far from
here, far away from here.
Lucero: And Domingo?
Maia looks at him, the bus leaves and
remains
only Sunday drinking mate.
End.
(It is a work designed for theater
but if you want you can continue with
the script or adapt it for film)

om
Facilitators

It occurs to me as a race
curricular and extracurricular which is
adapted to the needs that
can have a group
certain number of people with a specific
hobby and facilitator will help with
their knowledge
for works to be carried out
different branches. So he
facilitator can have three
levels the first is to be a third and
fourth facilitator
year approved and one year of the
administration degree
companies then the facilitator of
second with complete basic cycle
and a year of administration and then
the professional facilitator with
some completed university degree plus one
or two years of
business Administration.
The task is simple and there is a lot
people who are practicing it
currently and does not realize that it is
a trade or a profession
so let's give an example
A third-party facilitator in a company
can write the
newspaper and a facilitator
second you can write the
newspaper put ads and help
throughout the business process
and then the professional facilitator is
the one in charge of the issues of
programming tools
a website and that all
others collaborate with that cause
which can be many of

products and services. In this
moment there are people who are
working networks doing facilitation in a dissemination
constant towards a purpose and a
reason then there are people who believe
groups that would become
second-rate facilitators and
professional facilitators are
What are they made of all this
set of material they work on it
promote and are doing so
for a long time and for
Generally the facilitators so far are not paid so
what is sought is that the
people who are dedicated to
one company or several companies
through the internet they get paid
for its service and its category
then it is no longer that they are the
Internet users but they are going to
become facilitators.
And the name facilitators comes to mind
because they are people who
shorten the path of
institutions and companies
with their efforts and
Generally this help is not remunerated.
Then the facilitator who
makes things easy by paying you
does good for society and
he promotes work without falling into slavery then
giving them levels and incentives will
work better and they will focus
better in studies and this helps

for companies because they will have many people working
for them without having to invest the difficult market research or
wasting time on the networks, in short, a lot of benefits for people
who simply do not have work until now and their
work is going to be a facilitator. So to this group of people
called facilitators will have
people who teach him that to
that's the administration of
companies will then go through a
group of councilors who could be voted
for by the three levels of
facilitators and there the
institution and then there is the
remuneration that will be
half of spending on employees and
that companies that have
products or services contribution as
a box is provided
certain price for time
of people who work as
facilitator let's give another example
people who are in charge of
fee collection of apartments if they were
facilitators would charge for the
service of having to collect the money
from all the apartments and then having to pay
facilitators are everywhere
we just get on with it
think around us who
He is helping us or doing us a favor, he is a facilitator so he has to regularize himself.

So in this way the jobs are
they make more effective they are taken
creative professionals with
flexibility to put another
For example, radio announcers are
information facilitators to
people the dj who and is a
facilitator working for entertainment and
a production
that works to make it easy
their work
facilitators. So to what
I want to get to everyone
We are working for everyone to make our
task easier in
our life what is proposed is a very
simple fact very
human is that people who
They work as facilitators that
they make life more pleasant
have the possibility of being so
financially honorable
a laborer for example
then it's not going to be the same
third-party facilitator work
that of the first-class facilitator
but all three are necessary for
the fulfillment of a duty, for example,
in a file there is a
president and the others are all
second class facilitators and me
I am in the position of
third-rate facilitators and what
I'm going to say that the bps should
take this project, I already said it
because we don't want to
that our children and our

loved ones fall into slavery tomorrow so
if they pay you for a job and there is so
much
people looking for work and
helping has to have the honor
to be a facilitator as well
like the disabled because
The facilitators are not at the level of
obtaining a pension nor of a common job
and
current because they are precisely
facilitators, they are good people
friendly and having that training
which is the right one, they all pass
to work what makes a boom
the economy with a cost
very low And I say goodbye with another
example the writer is a
social facilitator therefore for now not
many books are sold
but when the
facilitators who sell the books
the market is going to be booming and
I personally wouldn't mind giving them a
percentage of
the earnings. Then there would be a
rise of work of goodness of work of
pleasure in work
what everyone doing facilities
as workers we will have the
option to continue in this career
beautiful but charging and
working 8 hours a day. Although the
facilitator will work all the time
because he works with
his mind with what is written or
what is created. So
let's start thinking how many

people approached us
help and they were facilitators
and how many people gave us jobs because
they were facilitators and then yes
We put it on the balance to be a
facilitator and it is good business. This
note has to be seen
first-class facilitator to do the
processing so that the
course if it is private and if it is
state level a call what is it
what occurs to me. The only one that
you have to know to take into account a
facilitator is what his
hobby because from there you will find
help for their parents who
They have similar hobbies.
This also ends with that
go down there is student and that of the
who do not want to study putting
in your hands a race to your
scope which will bring more
serenity and a hope for
short term students this
It would help a lot and it wouldn't be
discard the materials within
the school and within the Lyceum and the
faculty and the utu of facilitator so the
insertion is a little faster
Hello reintegration into society.

Bookstores
This is a group of investors
make a Latin American network of
book editions and sales

new in established bookstores or
created by this same group of editors.
It occurs to me that for
shopping can sell well
being not exclusive for bookstores
There are stationery stores and bazaars
and recreational game houses that you can
append. The name of the publisher has to
sound prestigious. Then
the sale is as it was done before
to give work to salespeople (
that work for those houses) to
Have friends visit and sell by
collection. There are branches of
printing throughout Latin America.
The system is like this. The writer makes
a book. He calculates the price and then
sells it. But not all
they have to invest so since there are
many there are more authors there are to
edit a great diversity and
all styles of books that can be ordered
on demand from
a copy. Let's imagine then having houses
that the public can access
new books in an environment
gentle with salespeople or
salespeople dedicated to the customer.
Also sale to public bookstores
and also online sales now
obtained the book. It would be a great
growth in the sector and in the
market. If you have capital to
invest and that group or that one is made
person will gain great prestige.
To the contribution of culture
international.

The cost is 12 books 100 dollars.
(Approximately)
And if I had the capital I would put
"Triumfo" bookstores in
all the shopping... a little ambitious
right? But it would be
Well.
The initial capital can be made by
selling used books in batches.
Agreements can be made to
sell to public libraries and
other private ones already established.
What is important for this business
is to do the accounts well and form
a cultural investing group.
There are tutorials on YouTube
authors and editors.

Son's contributions
Since we live in a codependent society,
it is very
important to know that all
mothers caring for their children
for reasons x that those boxes from which
the mother receives the
retirement is a beneficiary of a
percentage of what they earn
children to live a retirement
better even with your children
older this means that the
children at work go collecting
funds for your mother your father or

the sutor of her and in that way that by
saying it is not a tax the
salaries is a contribution that is made
because when a mother reaches
retirement age does not count
sometimes with enough resources
then what you have to do is
box by box collect money for a
said percentage of the
young workers towards
parents who are going to retire and then
we would enter a circle of non-dependence
long term true. So he
bigger problem is where
we get the money without being the
salary tax for
contribute to our future and
future of our parents and the issue is
very simple that when
you are going to write in a system
retirement The young man is given a
percentage according to the box for
contribute to your parents' house
then that money would only be destined
for the cash register
retirement that belongs to
our parents and we would be
covering possible losses
that we can have in the future
at work.
Then the problem would be fixed
of codependency or
dependence since the children
would give parents greater well-being in
retirement without
they affect them indirectly.
We all think how to help
our parents when they are

oldies and one of the best ways to hire services
medication companions
hospitals and give them a hand
since we started our
task as adults and as
workers to contribute that
same box in which our parents are and in that way
make your retirement more dignified as everyone deserves
but for that you have to do something
or about two three percent of the
salary would not give us anything and we
It would encourage them to work better
and that proof of work law would be
removed and then we would begin to
contribute to the
future of our old people who
it will even be the present for
us and I speak in a way of
nature of being lost
that codependency and also something
very important that children
be sure that to that box where they contributed when
unfortunately they are not there
parents can use as a retirement with the support of their
children and then there would be a
very important benefit within society.
Finally the parents
They give me a lot of love, they raise us, they give us everything to live, to make us be worthy humans and so many others.
things more so that this injustice of giving

beggars for retirees and
Through a campaign he insists
young people to help the boxes
of his parents because today I
tomorrow you may regret not
contribute if you don't have them and in
definitively live the ruin then
That is why I made this document so that
it does not happen. This would be until
the end of the
co-dependence so that there is a
greater good within society.
So in that way of dying
tutor stays with them
benefits than the deceased.
Pay attention that it is not about
removing
but to form a common good
between parents and children as
there are already in some boxes but not
in
all.
I leave it to the authorities of
the action of these sayings.

Spend weekend on haloween
Lights lights and witches
More sweets
In the illuminated city
I am the witch
The witch
What turns on
Lights
So that the children
make sweets

What a prank, right?
Lights lights and witches
More sweets
In the illuminated city
I am a good witch
Without broom
Come my friend
Come friend
Lights lights and witches
More sweets
In the illuminated city
Let's touch
All the doors
What are they going to come out
Let's dress up
Let's do dances
Let's get together with friends
Let's go to a party?
Lights lights and witches
More sweets
In the illuminated city
Today we kiss
Long live the witches
Of white
Magicians
beautiful
What an elegant suit
Lights lights and witches
More sweets
In the illuminated city
and with lights
Psychedelic
we will dance
Until sunrise
For the big ones
Let the cup be worth it
Lights lights and witches
More sweets

In the illuminated city
Spend weekend on haloween
Lights lights and witches
More sweets
In the illuminated city
Media
Nowadays the radio has a
service called garden
where are all the radios in the
world but this service apart from not
being very well known in
first instance would also be
favorable because it is a Union of
the radios and what they want to get
across at this moment are the
products and services too
as well as content made for YouTube, for
example.
So what I go to first is that the radios
Established run a campaign using add
words what happens
through the promotion system
Gmail and also did a calculation
approximate that they can in a
very short time and reach 8
million 500 thousand more or less more
then from that to
begin it occurred to me that the day
of the radios on media day or one day
propose the Google doodle manages to play
a small game with reference to the media
that can be programming a station making
a
play to listen to music and everything
This is going to go in favor of the
campaign that takes over the medium
corresponding investing in the

promotions that are given in Gmail and then in that way it is
continue with the radios to everyone world or the medium of advertising or propaganda then the market
would start to go faster in this category since the doodle could be the garden itself. Because the
business is to do that through a little google game be
redirect the public towards a long campaign that will have its adherents and this is proven when they made the vah leak that immediately the entire world went to learn music to the corresponding pages and that
It was 5 or 6 years ago and they are still sustaining themselves with that advertising imagine that
powerful it is.
So I wish you that it is possible
do this campaign for good
of radio products and
services and for the world to be
the world.
The main reason is that they download the radio application in this case
in the promotions they have
to be thought according to the
clients and future clients who want to attract.

His will be done
television program for
family entertainment.

Parents and children or mother and son or guardian and daughter or son participate. Etc.
It is proposed with make your
will that four families participate per program in the
which father fares to his son
testing on a television with four images of what
are doing through
parental errands to
children with commandments of production
and everything different and
Those who complete the errands in less time move on to the next
round.
Then the program called
does his will
awards to families who
know how to direct their children better.
It could be programming
daily or weekly.
For this they are called casting
which could be the school if you wish
said that you wish this proposal.
So the purpose of the program
with a public vote it would be
person who takes better care of their superiors.
So if you do his will it would be
a very non-fiction program
realistic and educational in respect for the family and for the family.
Estimated program time
one hour if per day and two hours
if it were weekly.
It can be done in any country and
what would be well seen by the

society is that it does its will
It would be a program even if it seems
religious is not religious although
seems fashionable is not fashionable
What would benefit who most?
quickly and better listen to the
wills of whoever is in charge.
the public vote would be affection
that a certain family has him and
you can make rounds for the
next week or next month
comes with the winning family.
The question is going to be who had
more will per cycle.
It is proposed to do live or reality.

Record labels
I was thinking about making a series of
ringtones to make a record collection for
companies.
and institutions and from there they
choose
or each one choose the corner that suits
you
like and also for groups of
friends and what they can
imagine of clients who form
a group of people or also
for individual use. let's remember
when the CDs first came
They were all a collection of
movie music today there is the
alternative that they are all
rington gives the number of genres
musicals that there are and the amount of

public that there is and cell phones and new cell phones that are going to come.
And how things are changing
quickly you can also make a platform a call to
musicians all record labels
united and here what Agadu is to give an example of where the
musicians can find out about this
kind of contest that will give them the possibility of entering the market with other artists in a
salad but that's not all it is
we go a little further than
CD's as well as the platform
that the owners of
supermarkets and kiosks and shopping stores and houses of
music have the key to
come in and do some kind of
recharge or recharge itself to the
cell phones in question, which would be many. Then, if feasible, everyone's CD collection is made.
the artists who participated with a duration of up to 15 seconds the piece more or less
each. Then from there it is done
a campaign not only for a
artist but for all those who
want to get into the business or
at no cost to the artist who will
have the benefit of showing
artistically as a musician and
spread his music and let the public
make the decision to place it in
his cell phone, which apart from that,
doesn't have to belong to just an artist.

It can be many and ultimately
instance make a call and
the recharge is via USB which would be
a little more complicated than
downloading it directly to your cell
phone
But I don't know if it could work for a
kiosk. The intention is to
only in the country and globally as well
and in conclusion it would be
giving a very large space
between technology and culture and
commerce. The record companies will
benefit and therefore the
musicians too. So the idea
It is that and I believe with a process
of
continuity with payment methods
modern. Then the project
extends towards the convenience of
the record company.

Mosca Tel Credits
Loans from Queen Muscatel
Call her and get in the car
From 5000 dollars
For waste. That would be the hook then
other things are requested
.
#5000 Muscat
The idea came about when I was working at
a house of appliances
The owner came and told me this is what
he has the sale and raised his hand
he made the fly symbol

So I associated that with the
desire that he had to drink wine
that moment and I didn't have the fly
and one thing just came to mind
scene from when I was a child
the grape harvest festival
stones than a queen in a chariot
andante throws me a bunch of muscatel
grapes and then I remembered
also from a phone call they made to me
and there I put together the name
muscatel that
It would be a loan service in
my case to buy wine
muscat then I thought there is
people more expert in this and what
I can use propaganda to
make some new loans
they are called muscatel Of course at the
beginning I say to waste it
whatever you want, well the fact is how
the money is collected for what
so much I think it would be a
loan without chases but
given only once so that
the one who takes the loan has
long time to pay it
even for life, that is, a loan of $5000
or $10,000 or $15,000, the maximum for
the client.
applicant without being in the treasury
and
without being in debt you can pay it in
your entire life if you want only
presenting the document
identity. Mocatel is a credit
for young people rather than
want to get into the market more

quickly and with that data
would charge and they would be giving
many more loans and
I would be charging much more and
I can do this anyone
person or group or cooperative
to push the country further in that
point where the client
need more than ever to
develop a project or
buy machinery or even
to invest in other things and then
pay it and only when
payment ends you can return to
take out another credit and I say stop
young people because it would be good
that they do not have debts.and the
Approval would be through the
identification document. So more or less
the advertising is done and you
They will continue and the company will
be set up
Of course it is studied by a
accountant and I am most sure
that muscatel is going to be a success.
Take out the queen's loan right.
(I had to study a little)
